

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PRESS OF EDWARD W. WHEELER.

PREFACE TO THE FIRST EDITION.

AT the first Congress of the American Ornithologists' Union, held in New York, September 26-29, 1883, the following resolution was adopted :—

"Resolved, That the Chairman appoint a Committee of five, including himself, to whom shall be referred the question of a Revision of the Classification and Nomenclature of the Birds of North America."

In pursuance of this resolution the following Committee was appointed: Messrs. Coues, Allen, Ridgway, Brewster, and Henshaw.

The Committee, having held numerous sessions in Washington and New York, presented its Report at the second Congress of the Union, held in New York, Sept. 30 to Oct. 2, 1884, when the following resolution was adopted :—

"Resolved, That the Report of the Committee on the Revision of the Nomenclature and Classification of North American Birds be accepted and adopted, and that it be recommitted to the Committee, with instructions to complete and submit it to the Council as soon as practicable; and that the Council be empowered and instructed to accept and adopt the Report as finally rendered, with such modifications as they may deem necessary, and to publish the same, copyrighted, in part or in whole, and in one or more forms, in the name and under the auspices of the American Ornithologists' Union."

The Committee, having continued its sessions, presented its final report to the Council at a meeting held in Washington

on the 21st of April, 1885, when the Report of the Committee was accepted and adopted, and was referred again to the Committee for publication, the Committee to exercise such editorial revision as might seem necessary.

Pursuant to the foregoing resolutions of the Union and Council, the Committee now offers to the public, in the name and on behalf of the Union, the result of its labors, consisting of a List of North American Birds, preceded by the Code of Rules adopted by the Committee for its guidance in the preparation of the List.

The Committee ventures to hope that the new Code will find favor, not only with ornithologists, but among zoölogists generally.

PREFACE TO THE SECOND EDITION.

AT the Eleventh Congress of the American Ornithologists' Union, held in Cambridge, Mass., November 20-23, 1894, it was voted to publish, as early as practicable, a new edition of the Union's Check-List of North American Birds, to include the numerous additions and nomenclatural changes made in the several Supplements¹ to the Check-List since the publication of the original edition, together with a revision of the 'habitats' of the species and subspecies, but omitting the Code of Nomenclature.² The original Com-

Check-List | of | North American Birds | according to the Canons of Nomenclature | of the | American Ornithologists' Union | — | Abridged Edition | Revised | — | Published by the American Ornithologists' Union | 1889. — 8vo, pp. 71. Includes the additions to the original Check-List made in the first Supplement.

² Republished separately in 1892 as a pamphlet of 72 pages with the following title: The | Code of Nomenclature | adopted by the | American Ornithologists' Union | — | Zoölogical Nomenclature is a means, not an end, of Zoölogical Science | — | New York | American Ornithologists' Union | 1892.

mittee on Classification and Nomenclature of North American Birds was reappointed¹ to take charge of the work. The Committee held sessions in Washington, D. C., January 15-19, 1894, and February 12, 13, 1895, to outline the work and to rule on the questions involved in the publication of the revised List. The revision of the matter relating to the geographic distribution of the species and subspecies was undertaken by the Committee as a whole, each member in turn taking it in hand, while the incorporation of typographic and other rectifications made during the sessions of the Committee,² and the final preparation of the manuscript for the printer, was referred to a subcommittee consisting of the Editor of 'The Auk,' to whom was also assigned the general editorial supervision of the work.

The following extracts from the Introduction to the Code of Nomenclature (pp. 14, 15) will serve to explain the scope and plan of the Check-List, including the method of incorporating additions.

"1. That the term 'North American,' as applied to the proposed List of Birds, be held to include the continent of North America north of the present United States and Mexican boundary, and Greenland; and the peninsula of Lower California, with the islands naturally belonging thereto.

"2. That species be numbered consecutively, and that subspecies be enumerated by affixing the letters *a*, *b*, *c*, etc., to the number borne by their respective species; provided, that any subspecies of a species not included in the North American Fauna shall be separately numbered as if a species.

"3. That stragglers or accidental visitors, not regarded as components of the North American Fauna, be distinguished by having their respective numbers in brackets.

¹ With the exception of Mr. H. W. Henshaw, who was unable to serve, and Dr. C. Hart Merriam was appointed in his stead.

² The Committee desires to here acknowledge valuable assistance received, especially in the preparation of the geographic portions of the list, from Major Charles Bendire, Mr. Frank M. Chapman, Dr. Walter Faxon, Dr. A. K. Fisher, Mr. Gerrit S. Miller, Jr., and Dr. T. S. Palmer. The Committee is further indebted to Dr. Palmer for numerous corrections in the citations of original references.

"4. That any subsequent additions to the list be interpolated in systematic order, and bear the number of the species immediately preceding, with the addition of a figure (1, 2, etc., as the case may require), separated from the original number by a period or decimal point, thus giving the interpolated number a decimal form (*e. g.*, 243.1, etc.), in order that the original numbers may be permanent.

* * * * *

"6. That Giraud's at present unconfirmed species of Texan birds be included in the List on Giraud's authority.

"7. That species and subspecies the zoölogical status of which cannot be satisfactorily determined, like, *e. g.*, *Regulus cuvieri* and *Spiza townsendi* of Audubon, be referred to a hypothetical list, in each case with a brief statement of the reasons for such allocation.

"8. That a list of the fossil species of North American birds be added as an Appendix to the List proper.

"9. That the names of subgeneric and supergeneric groups of North American birds be included in the List in systematic order, to the end that the List may represent a classification as well as a nomenclature of the birds.

"10. That references be given to the original description of the species, and to the publication where the name as adopted in the List was first used; that the number borne by each species and subspecies in the Lists of Baird, 1858, of Coues, 1873, of Ridgway, 1880, and of Coues, 1882, be bracketed in chronological order after the synonymatic references.

"11. That a summary statement of the habitat of each species and subspecies, with special reference to its North American range, be included in the List.

"12. That the name of each bird shall consist of its generic without its subgeneric name, and of its specific with its subspecific name, if it have one, without the intervention of any other term.

* * * * *

"14. That every technical name be followed by a vernacular name, selected with due regard to its desirability.

"15. That the name of each species and subspecies be followed by the name of the original describer of the same, to be enclosed in parentheses when it is not also the authority for the name adopted.

"16. That all specific and subspecific names shall begin with a lower-case letter.

"17. That the sequence in classification followed in previous Lists be reversed, the List to begin with the lowest or most generalized type, and end with the highest or most specialized."

Larus furcatus NEB. Voy. 'Venus,' Atlas, pl. 10 (1846).

Creagrus furcatus BONAP. Naumannia, 1854, 213.

[B 679, C 559, R 678, C 791.]

In all probability erroneously accredited to North America. At least nine examples are now known,—the type, said to be from Monterey, Cal., three from the Galapagos, one from the coast of Peru, and four from Malpelo Island (Lat. 3° 59' N., Long. 81° 34½' W.).

FAMILY **DIOMEDEIDÆ**.

4.1. **Diomedea exulans** LINN.

Wandering Albatross.

Diomedea exulans LINN. S. N. ed. 10, I. 1758, 132.

[B—, C—, R—, C—.]

GEOG. DIST.—Southern oceans; said to have occurred in Tampa Bay, Florida, and off coast of Washington. (Cf. COVES, Auk, II. Oct. 1885, 387; XII. April, 1895, 178; RIDGWAY, Man. N. Am. B. 1887, 51. The Florida record is open to question, and the others are unsatisfactory.)

FAMILY **PROCELLARIIDÆ**.5. ***Puffinus kuhlî*** (BOIE).

Cinereous Shearwater.

Procellaria kuhlî BOIE, Isis, 1835, 257.*Puffinus kuhlî* BONAP. Consp. II. 1856, 202.

[B 651, C 596, R 708, C 831.]

An Eastern Atlantic species, of which no American specimens are known to exist in collections.

6. ***Oceanodroma hornbyi*** (GRAY).

Hornby's Petrel.

Thalassidroma hornbyi GRAY, P. Z. S. 1853, 62.*Oceanodroma hornbyi* BONAP. Consp. II. 1856, 195.

[B 641, C 592, R 727, C 827.]

A very distinct species, of which only one specimen has been obtained, the alleged locality being the "northwest coast of America."

FAMILY **PHALACROCORACIDÆ**.7. ***Phalacrocorax perspicillatus*** PALL.

Pallas's Cormorant.

Phalacrocorax perspicillatus PALL. Zoog. Rosso-As. II. 1826, 305.

[B 621, C 533, R 648, C 756.]

Believed, on good evidence, to be now extinct, as it unquestionably is in the locality (Bering Island) where originally discovered. Only four specimens are known to exist in collections, — two in the St. Petersburg Museum and one each in the Leyden and British Museums. Even if existing, it has no valid claim to a place in the North American fauna. (Cf. STEJN. Pr. U. S. Nat. Mus. VI. 1883, p. 65.)

FAMILY **ARDEIDÆ**.9. ***Ardea wuerdemanni*** BAIRD.

Würdemann's Heron.

Ardea wuerdemanni BAIRD, B. N. Am. 1858, 669.

[B 488, C 450, R 486, *part*, C 656, *part*.]

Believed to be either the colored phase of *A. occidentalis* AUD., or an abnormal specimen of *A. wardi* RIDGW. (Cf. RIDGW. Bull. U. S. Geol. & Geog. Surv. Terr. IV. No. 1, 1878, pp. 229-236; Bull. Nutt. Orn. Club, VII. 1882, pp. 1-6; Auk, I. 1884, pp. 161-163; Water B. N. Am. I. 1884, pp. 7-13.)

10. ***Ardea (Dichromanassa) pealei* BONAP.**

Peale's Egret.

Ardea pealei BONAP. Ann. Lyc. N. Y. II. 1826, 154.

[B 482, C 355, *part*, R 491, *part*, C 661, *part*.]

Supposed to be the white phase of *A. rufescens* GMEL., but possibly entitled to recognition as a local or geographical race.

FAMILY SCOLOPACIDÆ.

11. ***Tringa (Actodromas) cooperi* BAIRD.**

Cooper's Sandpiper.

Tringa cooperi BAIRD, B. N. Am. 1858, 716.

[B 527, C 422, R 535, C 618.]

Known only from the single specimen from which the species was originally described, taken on Long Island, in May, 1833, and still extant in the National Museum. The status of the species is in doubt.

11.1. ***Numenius arquatus* (LINN.).**

European Curlew.

Scolopax arquata LINN. Syst. Nat. I. 1758, 145.

Numenius arquatus LATH. Gen. Syn. Suppl. I. 1787, 291.

[B —, C —, R —, C —.]

GEOG. DIST.—Northern Europe, migrating to southern Africa. Recorded as occurring on Long Island, N. Y. (Cf. MARSHALL and DUTCHER, Auk, IX. Oct. 1892, 390-392.) While there is no question as to the proper identification of the specimen, the evidence that it was taken on Long Island is not considered entirely satisfactory.

FAMILY **CATHARTIDÆ**.

GENUS **GYPAGUS** VIEILLOT.

[B —, C —, R —, C —.]

GEOG. DIST.—Tropical continental America. Recorded as occurring on the Rio Verde, Arizona, but its identity not satisfactorily determined. (Cf. COUES, Bull. Nutt. Orn. Club, VI. 1881, p. 248.)

13. **Cathartes burrovianus** CASS.
Burroughs's Turkey Vulture.

Cathartes burrovianus CASS. Pr. Ac. Nat. Sci. Phila. II. 1845, 212.

[B 4, C —, R —, C —.]

GEOG. DIST.—Mexico and eastern South America. Reported as having been seen near Brownsville, Texas. (Cf. DRESSER, Ibis, 1865, p. 322.)

FAMILY **FALCONIDÆ**.

14. **Buteo cooperi** CASS.
Cooper's Henhawk.

Buteo cooperi CASS. Pr. Ac. Nat. Sci. Phila. VIII. 1856, 253.

[B 29, C 349, R 437, C 514.]

Probably the light phase of *B. harlani* AUD. (Cf. RIDGW. Auk, I. 1884, pp. 253, 254; *ibid.*, II. 1885, pp. 165, 166.)

[B 64, C —, R 391, C —.]

GEOG. DIST.— Mexico. There is said to be a specimen in “the collection of the Philadelphia Academy of Natural Sciences, labelled Rio Grande, Texas, J. W. Audubon,” but there is doubt as to whether the specimen was really taken within the limits of the United States. (Cf. BAIRD, Birds N. Am. 1858, p. 66, foot-note; RIDGW. Man. N. Am. B. 1887, 269.) Its occurrence in Texas is not improbable but the evidence is unsatisfactory.

FAMILY **CAPRIMULGIDÆ**.16.1. **Chordeiles virginianus sennetti** (COUES).

Sennett's Nighthawk.

Chordeiles popetue sennetti COUES, Auk, V. Jan. 1888, 37.

Acanthis brewsterii RIDGW. Pr. U. S. Nat. Mus. VIII. 1885, 354.

[B —, C 147, R 180, C 211.]

The type-specimen, taken at Waltham, Mass., remains unique. It cannot be identified with any known species, but may be a hybrid between *Acanthis linaria* and *Spinus pinus*. (Cf. BREWST. Bull. Nutt. Orn. Club, VI. 1881, p. 225.)

18. **Spiza townsendii** (AUD.).

Townsend's Bunting.

Emberiza townsendii AUD. Orn. Biog. II. 1834, 183.

Spiza townsendii RIDGW. Pr. U. S. Nat. Mus. III. Aug. 24, 1880, 182.

[B 379, C 192, R 255, C 288.]

The original specimen, taken May 11, 1833, in Chester County, Pa., by Mr. J. K. Townsend, remains unique. Its peculiarities cannot be accounted for by hybridism, nor probably by individual variation.

FAMILY **VIREONIDÆ**.

GENUS **HYLOPHILUS** TEMMINCK.

Hylophilus TEMM. Pl. Col. III. Livr. 29, 1823, text, and pl. 173, fig. 1. Type, *H. thoracicus* TEMM.
